PERSONAL STATEMENT

Simon Hsien-Chi Wan follows minimalism as well as realism and aims to create photographs reflect the stunning beauty of nature and the melodic universe inside music. Simplicity is the essential element that can be found in many of his works.

As a freelance photographer, his relevant experience and knowledge in music and education reacting with independent, patient and focused attitude has provided extra thrust in his gig, travel and urban images.

Contemporary digital-led or conventional film-based cameras, and other creative mediums has enabled him to illustrate different aspects of the warmth inside individuals staying in the apathetic society. However, he never feel conceited or stop exploring the unknown boundaries of photography.
